the 1990s, the number of people with a diagnosis of schizophrenia has increased in many countries (1).

There is a growing awareness of the need to improve the quality of life of people with schizophrenia. The World Health Organization (WHO) has developed a number of instruments to measure the quality of life of people with schizophrenia (2). The WHO Quality of Life Scale (WHOQOL) is one of the most widely used instruments (3).

The WHOQOL is a self-rated questionnaire that assesses the quality of life of people with schizophrenia (4).

The WHOQOL is a self-rated questionnaire that assesses the quality of life of people with schizophrenia (5).

the 1990s, the number of people who have been employed in the public sector has increased in all countries.

There are several reasons for the increase in public sector employment. First, the public sector has become an important source of employment for many people, especially in developing countries. Second, the public sector has become an important source of income for many people, especially in developing countries. Third, the public sector has become an important source of social services for many people, especially in developing countries. Fourth, the public sector has become an important source of political power for many people, especially in developing countries.

The increase in public sector employment has led to a number of problems. First, it has led to a decrease in the quality of public services. Second, it has led to a decrease in the efficiency of public services. Third, it has led to a decrease in the transparency of public services. Fourth, it has led to a decrease in the accountability of public services.

A diagram of an open book. The book is shown from a top-down perspective, lying flat. The left side is the inside front cover, and the right side is the inside back cover. A central vertical strip represents the spine. The entire book is set against a green background. The covers are white with a light green border. The spine is a thin vertical line with a double-headed arrow pointing up and down, and the word 'Spine' written vertically next to it.

the 1990s, the number of publications on the topic of the present study has increased steadily (see Figure 1).

As a result of the increasing number of publications, the number of articles in this special issue has also increased. The first special issue on the topic of the present study was published in 1995, and the number of articles in this special issue has increased steadily since then (see Figure 2).

The present special issue contains 10 articles, which are divided into three sections:

The first section contains three articles that focus on the development of the self-concept. The second section contains three articles that focus on the development of the self-esteem. The third section contains four articles that focus on the development of the self-identity.

The first section contains three articles that focus on the development of the self-concept:

The first article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-concept in the transition from childhood to adolescence.

The second article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-concept in the transition from adolescence to adulthood.

The third article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-concept in the transition from adulthood to old age.

The second section contains three articles that focus on the development of the self-esteem:

The first article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-esteem in the transition from childhood to adolescence.

The second article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-esteem in the transition from adolescence to adulthood.

The third article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-esteem in the transition from adulthood to old age.

The third section contains four articles that focus on the development of the self-identity:

The first article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-identity in the transition from childhood to adolescence.

The second article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-identity in the transition from adolescence to adulthood.

The third article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-identity in the transition from adulthood to old age.

The fourth article, by Van't Hof and Van't Hof (2007), focuses on the development of the self-identity in the transition from old age to death.
